# Administration of Medication Policy

## Help for non-English speakers

If you need help to understand the information in this policy, please contact Werrimull P-12 School on 03 5028 1251 or werrimull.p12@education.vic.gov.au.

## Purpose

To explain to parents/carers, students and staff the processes Werrimull P-12 School will follow to safely manage the provision of medication to students while at school or school activities, including camps and excursions.

## Scope

This policy applies to the administration of medication to all students. It does not apply to:

- the provision of medication for anaphylaxis which is provided for in our school's Anaphylaxis Policy
- the provision of medication for asthma which is provided for in our school's Asthma Policy
- specialised procedures which may be required for complex medical care needs.

## Policy

If a student requires medication, Werrimull P-12 School encourages parents to arrange for the medication to be taken outside of school hours. However, Werrimull P-12 School understands that students may need to take medication at school or school activities. To support students to do so safely, Werrimull P-12 School will follow the procedures set out in this policy.

### Authority to administer

If a student needs to take medication while at school or at a school activity:

- Parents/carers will need to arrange for the student's treating medical/health practitioner to provide written advice to the school which details:
    - the name of the medication required
    - the dosage amount
    - the time the medication is to be taken
    - how the medication is to be taken
    - the dates the medication is required, or whether it is an ongoing medication
    - how the medication should be stored.
- In most cases, parents/carers should arrange for written advice to be provided in a Medication Authority Form which a student's treating medical/health practitioner should complete. If advice cannot be provided by a student's medical/health practitioner, the Principal (or their nominee) may agree that written authority can be provided by, or the Medication Authority Form can be completed by a student's parents/carers.
- The Principal may need to consult with parents/carers to clarify written advice and consider student's individual preferences regarding medication administration (which may also be provided for in a student's Student Health Support Plan).

Parents/carers can contact Narelle Wright, Business Manager for a Medication Authority Form.

### Administering medication

Any medication brought to school by a student needs to be clearly labelled with:

- the student's name
- the dosage required
- the time the medication needs to be administered.

Parents/carers need to ensure that the medication a student has at school is within its expiry date. If school staff become aware that the medication a student has at school has expired, they will promptly contact the student's parents/carers who will need to arrange for medication within the expiry date to be provided.

If a student needs to take medication at school or a school activity, the Principal (or their nominee) will ensure that:

1. Medication is administered to the student in accordance with the Medication Authority Form so that:
    - the student receives their correct medication
    - in the proper dose
    - via the correct method (for example, inhaled or orally)
    - at the correct time of day.
2. A log is kept of medicine administered to a student. Where possible, two staff members will supervise the administration of medication.
3. The teacher in charge of a student at the time their medication is required:
    - is informed that the student needs to receive their medication
    - if necessary, release the student from class to obtain their medication.

***Self-administration***

In some cases it may be appropriate for students to self-administer their medication. The Principal may consult with parents/carers and consider advice from the student's medical/health practitioner to determine whether to allow a student to self-administer their medication.

If the Principal decides to allow a student to self-administer their medication, the Principal may require written acknowledgement from the student's medical/health practitioner, or the student's parents/carers that the student will self-administer their medication.

## Storing medication

The Principal (or their nominee) will put in place arrangements so that medication is stored:

- securely to minimise risk to others
- in a place only accessible by staff who are responsible for administering the medication
- away from a classroom (unless quick access is required)
- away from first aid kits
- according to packet instructions, particularly in relation to temperature.

For most students, Werrimull P-12 School will store student medication at the Sick Bay.
The Principal may decide, in consultation with parents/carers and/or on the advice of a student's treating medical/health practitioner:

- that the student's medication should be stored securely in the student's classroom if quick access might be required
- to allow the student to carry their own medication with them, preferably in the original packaging if:
    - the medication does not have special storage requirements, such as refrigeration
    - doing so does not create potentially unsafe access to the medication by other students.

## Warning

Werrimull P-12 School will not:

- in accordance with Department of Education and Training policy, store or administer analgesics such as aspirin and paracetamol as a standard first aid strategy as they can mask signs and symptoms of serious illness or injury
- allow a student to take their first dose of a new medication at school in case of an allergic reaction. This should be done under the supervision of the student's parents, carers or health practitioner
- allow use of medication by anyone other than the prescribed student except in a life threatening emergency, for example if a student is having an asthma attack and their own puffer is not readily available.

### Medication error

If a student takes medication incorrectly, staff will endeavour to:

| Step | Action |
|---|---|
| 1. | If required, follow first aid procedures outlined in the student's Health Support Plan or other medical management plan. |
| 2. | Ring the Poisons Information Line, 13 11 26 and give details of the incident and the student. |
| 3. | Act immediately upon their advice, such as calling Triple Zero "000" if advised to do so. |
| 4. | Contact the student's parents/carers or emergency contact person to notify them of the medication error and action taken. |
| 5. | Review medication management procedures at the school in light of the incident. |

In the case of an emergency, school staff may call Triple Zero "000" for an ambulance at any time.

## COMMUNICATION

This policy will be communicated to our school community in the following ways:
Included in staff induction processes

- Available publicly on our school's website
- Included in transition and enrolment packs
- Included as annual reference in school newsletter
- Included in our staff handbook/manual
- Discussed at staff briefings/meetings as required
- Made available in hard copy from school administration upon request
